

BANKS MARTIN GOES GREEN

BANKS  MARTIN

ECO OFF GRID LIVING POWERED BY FREE RENEWABLE ENERGY

Limitless green energy with our bespoke lithium powered system. Free electricity generated by solar panels is stored in our 95% recyclable LIFE-PO4 battery banks.

BANK OF LITHIUM BATTERIES

Powerful, cost effective and efficient, Transporter Energy batteries are portable and up to 60% lighter than lead acid batteries. 2 batteries provide 2.4KW of energy storage.

Our lithium batteries are 95% recyclable and have a 15 year lifespan significantly reducing the effect on the environment compared to lead-acid and gel batteries.

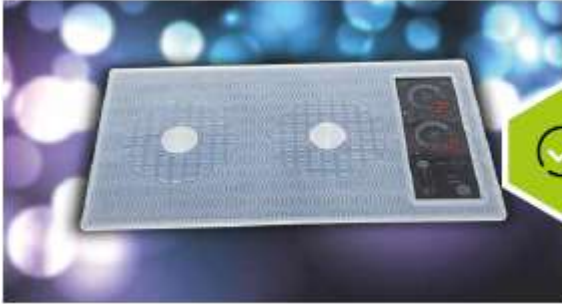

SOLAR POWERED

The solar panels provide a charge on days spent in the marina without having to start up a generator.

Harness the power of the sun with a solar panel providing a charge to replenish your power usage.

POWERED BY FREE RENEWABLE ENERGY

INDUCTION COOKTOP

Creating fantastic family food is now easier than ever. There are no dangerous fumes and no fire risk from naked flames, plus, the surface of the hob remains cool even immediately after cooking.

COMBI MICROWAVE OVEN

When it comes to convenience you can't beat a microwave for fast, nourishing food. With the green energy stored in the transporter energy batteries convenient food is available night and day.

DOMETIC 90L FRIDGE

The Dometic Coolmatic MDC 90L refrigerator has plenty of space for your provisions, including a 10l freezer compartment.
